-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### ***Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Drawings***

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: F3 (recited at line 15 of page 8) and C ("sealed zone" recited at line 2 of page 9). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### ***Specification***

The abstract of the disclosure is objected to because the phrase "[Figure 1]" recited at the end of the abstract should be deleted. Correction is required. See MPEP § 608.01(b).

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, the recitation of "the latter" (at lines 18 and 32) renders the claim indefinite because it is unclear for what "latter" being referred to. Does Applicant mean the "first gas" for "the latter" recited at line 18 and the "operating fluid" for "the latter" recited at line 32? Clarification is needed. The phrase "can be" recited at line 12 should be changed to "is" for positive recitation.

In claim 3, the term "floating O-rings" recited at line 3 should be simply changed to "floating O-rings" to avoid confusion (also noted in claim 17, at line 3).

In claims 10 and 13, the phrase "can be" (recited at line 13 of claim 10 and at line 8 of claim 13) should be changed to "is" for positive recitation.

In claim 25, there is insufficient antecedent basis for "the torch negative pole" recited at line 4 in the claim or from the preceding claim 1.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: J. S. Kane et al (US 3,242,305), Takabayashi (US 5,304,770), Luo et al (US 5,726,415), Yamaguchi et al (US 5,393,952), and Tateno (US 4,439,662).

The following is a statement of reasons for the indication of allowable subject matter: the prior art of record does not show or fairly suggest a plasma torch having a

Art Unit: 3742

combination which includes a third intermediate chamber for passage of a supplied gas arriving from the torch cooling chamber through third pipes made in the torch hollow shaft and nozzle to at least the torch plasma generation chamber through second pipes passing through the torch nozzle, wherein a sealed zone is formed close to the third pipes by first sealing parts that are inserted between the torch shaft and the torch nozzle and on both sides of the third pipes and the torch is provided with a forward starting position and a back torch operating position by a shaft drive means in the manner as recited in claim 1.

Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Claims 2-25 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
